Magento 2 Extension

(Version 1.0.0)

Table of Contents

Introduction to Multiple Cart Items Delete

"Multiple Cart Item Delete" Magento2 extension is used to delete multiple items from shopping cart in a single click. By default, Magento allows the buyer to delete one or all products from the shopping cart.

But if a user needs to delete more than one item without abandoning the cart he/she has to delete the item one by one. On top of this, the page will also refresh every time the user deletes a product. This is a tedious and a time consuming process.

This extension was developed to resolve this exact pain point. With the "Multiple Cart Item Delete" Magento2 extension, buyers will have the option to delete more than one item from shopping cart in a few clicks without refreshing the page.

Version & Compatibility Support

Version:

1.0.0 Stable

Compatibility:

This extension is compatible from Magento Community 2.1.x and Magento Enterprise 2.1.x to the latest versions.

Features

> ➢ Allows the buyer to remove multiple items with a few clicks.

> ➢ Allows the user to select & delete all the items in the shopping cart in a single click.

> ➢ Supports multiple store views.

> ➢ Page will be refreshed only once during the deletion process

> ➢ Can be used as a developer/testing tool (for removing multiple items in cart while testing).

How to Install This Module?

Step 1: Download the extension from My Downloadable Products in your account from our store or download the package from Magento Marketplace.

Step 2: Create a directory app\code\DCKAP\MultipleCartDelete in your Magento root directory and unzip here.

Step 3: Disable the cache to avoid flushing the cache, very often. It may affect performance for a while. However, you can skip this step. If you do so, clean the cache manually whenever needed.

php bin/magento cache:disable

Step 4: Enter the following at the command line to enable the module.

php bin/magento module:enable DCKAP_MultipleCartDelete

Step 5: Enter the following at the command line to run the setup scripts.

php bin/magento setup:upgrade

Step 6: Enter the following at the command line if the mode is set to default or production to deploy all the static files.

php bin/magento setup:static-content:deploy

Step 7: Clear the cache to configure the settings in backend (if you skipped Step3)

php bin/magento cache:clean

Step 8: Clear the cache to apply all the configurations (if you skipped Step3)

php bin/magento cache:clean

Step 9: Enable the cache once everything is done. Ignore, if you skip Step3.

php bin/magento cache:enable

That's it. You are done. If you still face any issues while installing, contact us at

Major Extension Benefits

➤ Buyers will view a new column in shopping cart page once retailers enable "Multiple Cart Item Delete" Magento2 extension in their store.

➤ On selecting the 'Delete' button in the top menu bar, buyers will have an option to delete the whole cart without any hassle.

➤ If the buyer has added many items to the cart but later decides to purchase only a few items, he/she can select the "Delete" option on the top menu bar and deselect the items. The buyer is spared from repeated deletion.

> ➢ The extension enhances the user experience by making deletion easier and cutting down on page refreshes. Reducing page refreshes enables faster checkout improving the conversion rate.
